My OnClick event doesn't work?

Hello, I have been working on this for two days. When the button is clicked, nothing happens. Console doesn't log anything. What am I doing wrong?

```
editEvent(e) {
  e.preventDefault();
  let edits = this.state.editEvent;
  edits.event_id = this.state.event_id;
```
. . .

My OnClick event doesn't work?

Hello, I have been working on this for two days. When the button is clicked, nothing happens. Console doesn't log anything. What am I doing wrong?

```
e.preventDefault();
let edits = this.state.editEvent;
edits.event_id = this.state.event_id;
axios.put('/api/editevent', edits)
.then((res) => {
  alert("EDITED");
  this.getEvent();
})
.catch((err) => {
  alert("ERR: " + err.response.status);
});
}
```

comments:

You need to code it like this:

```
e.preventDefault();
let edits = this.state.editEvent;
edits.event_id = this.state.event_id;
axios.put('/api/editevent', edits)
.then((res) => {
  alert("EDITED");
  this.getEvent();
})
.catch((err) => {
  alert("ERR: " + err.response.status);
});
}
```
